## Work History

### BRQ

July/2018 – today

My main role was as a UX/UI designer. Eventually I had helped as a UI developer. From February 2020 to March 2023, I had worked on projects in Itaú Private, designing internal tools for investment specialists. Since then, I also worked with Julius Baer Brasil and again with Itaú, with payroll loans.

### Input

February/2017 – January/2018

I have worked with website development and product UI analysis. An example of this work was the creation of the Vinhedo City Council website.

### Itaú

February/2016 – August/2016

I was part of the group of digital designers (as a temporary workforce). I worked with creating banners, internet banking page layouts (desktop and mobile) as well as for the open website.

### **ITV**

August/2014 – December/2015

The Vale Institute of Technology is a research institution focused on technology and innovation, funded by Vale (a large mining company). I worked on creating prototype interfaces for research projects. I was a co-author of a scientific paper.

### **Zentrale**

October/2012 – June/2014

I was asked to be a partner in a startup. I worked in the design department, creating the brand, website, social media material, and prototype development and testing.

### **Comtacti**

February/2012 – May/2013

I worked in a digital communications company that makes videos and websites. My work consisted of developing pages and applications for computers and tablets.

### **IBM Research**

May/2011 – December/2011

I worked, together with two Computer Science interns, to develop a prototype of a social software that deals with cross-boundary information sharing. My main role was to create the visual interface.

### **Copag**

September/2008 – December/2009

I was an intern, and my duties included updating the website and online store interface, as well as creating deck layouts for Brazilian and international companies. I had some contact with Copag USA.

### **Freelancer**

Since 2003

As a freelancer, I worked with layout creation and front-end for sites and apps, content management customization and visual identity creation.
